Tinkering with technology

EXPERIENCE

LINUX ENGINEER

Team of 4 maintaining enterprise-scale RHEL infrastructure supporting High Performance Computing (HPC) for research operations and critical web services for healthcare divisions.

KEY RESPONSIBILITIES:

- **Infrastructure Management**
 - Administer RHEL 8/9 production systems supporting research workloads and computational clusters
 - Lead RHEL 7 to RHEL 9 migration project, ensuring minimal disruption to ongoing research activities
 - Manage DNS/DHCP/IPAM via Infoblox for enterprise network infrastructure
 - Host and maintain WordPress websites for hospital divisions, ensuring

Priscilla Imanuel

- Design and maintain Ansible playbooks, roles, and collections as primary deployment mechanism
- Automate provisioning, configuration, patching, and operational workflows reducing manual intervention
- Version control all infrastructure code using Git with peer review practices
- Implement automated deployment pipelines for WordPress instances and application updates
- **Monitoring & Observability**
 - Configure Centreon for infrastructure and service monitoring across distributed systems
 - Develop Grafana dashboards for real-time metrics visualization and proactive alerting
 - Conduct root cause analysis and implement corrective actions for recurring incidents
- **Backup & Disaster Recovery**
 - Administer Rubrik backup platform for data protection across physical and virtual infrastructure
 - Execute regular restore testing and validate recovery point/time objectives
 - Ensure backup coverage for WordPress databases and media assets
- **HPC Cluster Operations**
 - Deploy and maintain Slurm workload manager for researcher job scheduling and resource allocation
 - Manage BeeGFS parallel filesystem for high-throughput storage requirements
 - Troubleshoot performance bottlenecks in compute-intensive scientific applications
 - Collaborate with research teams on capacity planning and compute requirement optimization
- **Web Services (WordPress)**
 - Deploy, configure, and maintain WordPress sites for hospital divisions on RHEL infrastructure
 - Manage PHP/FPM, Apache/Nginx, MySQL/MariaDB stacks with focus on security and performance
 - Implement SSL/TLS certificates and ensure secure communication channels
 - Coordinate plugin/theme updates and maintain compatibility testing procedures
 - Support content teams with technical guidance and access management

Technical Environment:

RHEL 8/9, Ansible, Slurm, BeeGFS, Infoblox, Centreon, Grafana, Rubrik, Git, Bash, Python, LDAP/SSSD, firewalld/nftables, SSH key management, WordPress, Apache/Nginx, PHP, MariaDB/MySQL

Priscilla Imanuel

Category	Technologies
Operating Systems	RHEL 8/9, CentOS, Rocky Linux
Automation	Ansible, Bash, Python, Git
Monitoring	Centreon, Grafana
Network Services	Infoblox (DNS/DHCP/IPAM), TCP/IP, Firewall
Backup Solutions	Rubrik
HPC Infrastructure	Slurm, BeeGFS, MPI
Security	STIG/CIS hardening, SELinux, SSH, SSL/TLS
Web Services	WordPress, Apache/Nginx, PHP, MariaDB/MySQL
August 2025 - Present	

TECHNICAL APPLICATION MANAGER (HEALTHCARE)

AMSTERDAM UMC

Operating in a team that manages applications which are used by departments such as Radiology, Radiotherapy, Pharmacy and laboratories. The focus lays on supporting healthcare processes. The systems are often linked to medical equipment and we work closely with engineers specialized in medical technology and medical instruments. Having a Linux oriented background, I am able to work with both Linux and Windows environments. I am part of a big team of engineers, analysts, solution architects and other specialists.

August 2022 - Present

LINUX CONSULTANT

PROXY MANAGED SERVICES

Mainly responsible for designing, implementing and managing technical solutions for customers. In short; the inventory of customer requirements and translate these into a technical solution. The team is self-managing and has recently started working according SCRUM

March 2021 - August 2022

TECHNICAL APPLICATION MANAGER

Priscilla Imanuel

Maintaining lifecycles of applications in a Linux environment - Change management - migrating VM's to Docker containers and creating pipelines the DevOps way.

October 2019 - March 2021

TECHNICAL APPLICATION MANAGER

VOLKER WESSELS (PROXY PROFESSIONAL SERVICES)

Providing third-line support on applications running within the organization.

October 2019 - March 2021

TECHNICAL APPLICATION MANAGER

INFORMATIE BEVEILIGINGSDIENST (PROXY PROFESSIONAL SERVICES)

Maintaining lifecycles of applications in a Linux environment - Change management - Deploying software solutions such as Filesender.

October 2019 - March 2021

TECHNICAL APPLICATIONMANAGER

GEMEENTE DEN HAAG (BRUNEL)

Responsible for the lifecycle management of applications - Deploying DTAP environments - Change management

March 2017 - Oktober 2019

IT-SUPPORT ENGINEER

ACADEMISCH MEDISCH CENTRUM

IT-support - Monitoring and maintaining computer systems (remotely)

May 2009 - March 2016

Priscilla Imanuel

EDUCATION

AMSTERDAM UNIVERSITY OF APPLIED SCIENCES

BSC. INFORMATION AND COMMUNICATION TECHNOLOGY

Computer Science - Software Engineering & IT-management

2012 - 2016

SKILLS

PROGRAMMING LANGUAGES & TOOLS

WORKFLOW

- ✓ Inventory
- ✓ Design
- ✓ Deploy
- ✓ Automate

Priscilla Imanuel

INTERESTS

Apart from being a computer engineer, I spent most of my time doing sports and working on my physique. In summer I bike, hike, climb and look for adventure.

Hackerspaces had a lot of influence on my view on tech ethics. I try to support the opensource movement.
